

RSSL SEMINAR

Vegan & Vegetarian Food – Meeting the challenge

**A FREE event for the Food,
Drink and Related Industries**

Location: Reading, UK

Date: Friday 19 October 2018

A unique opportunity to learn more about this specific food sector including:

- An overview of the latest trends in plant-based food and their labelling requirements
- The role of protein in plant-based product innovation
- Considerations for supplier management and manufacturing
- Cleaning validation as a manufacturing control
- Analytical testing to support your claims

This is a must attend event for product development, quality and technical teams.

VEGAN & VEGETARIAN FOOD SEMINAR

More people than ever before are choosing to follow meat-free or plant-based diets. In Europe, the number of consumers buying vegetarian food has reportedly risen by over 25%, and in the UK 7% of the population are now believed to identify as vegan. Factor in the growing popularity of flexitarianism and this becomes a major shift in consumer behaviour.

To be part of this opportunity, food and drink manufacturers are supporting these new dietary choices by developing ranges of great-tasting, authentic vegan and vegetarian products.

These developments can be complex and there are many things that need to be taken into consideration when developing and manufacturing vegan and vegetarian products. From the initial concept and the challenges of formulating with different plant proteins taking nutrition, taste and texture into consideration through to ongoing manufacturing controls. How do you ensure confidence in your supply chain, as well as in the controls you have around your manufacturing processes to minimise the risk of cross contamination? Are you commissioning the right testing to support your claims as well as meeting the requirements of consumers, the retailers and other industry bodies?

Join us on Friday 19 October in Reading, and in just one morning you will gain an overview of:

- Current plant based food trends and labelling requirements
- The role of protein in plant-based product innovation
- Considerations for supplier management and manufacturing
- Cleaning validation as a control
- Sampling and testing to support your claims

During and after lunch you will have the opportunity to network with fellow industry professionals and our expert team to discuss current industry issues and share ideas.

PROGRAMME

08:45	Registration and coffee
09:30	Welcome and introduction to RSSL
09:50	Overview of the plant-based sector – market trends
